How to register AutoThemes

The trial version of the software is limited for 10 days. The full version of the software is obtained by a license code provided upon purchase. The license code is based on the unique IMEI and the application can be used exclusively on the device it is licensed for. The license cannot be retrieved and applied to other devices.

support@symbianguru.com

How to install AutoThemes

Please transfer the .SIS file to your mobile phone via Bluetooth, IRDA or Cable. After that, follow the installation instructions on the mobile screen.

You will be able to install the application on your phone memory or on the memory card.

Working with AutoThemes

How to start

AutoThemes Application can be opened in following ways (depending on the phone):

- Clicking on the Menu button → AutoThemes
- Clicking on the Menu button → My Own/Programs → AutoThemes

General information

AutoThemes application is meant to change your mobile phone themes automatically based on your own schedule. Themes can be changed depending on the active profile, or depending on your personal time schedule.

First Application Start

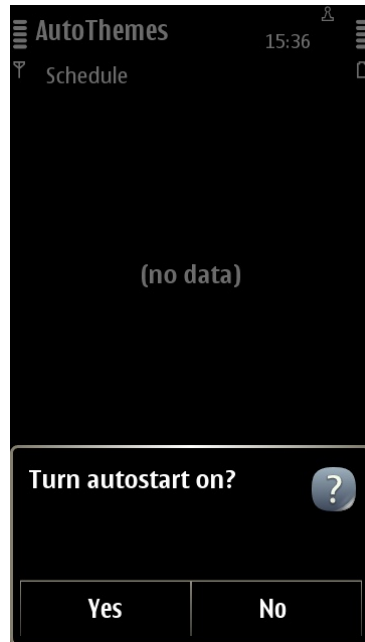

At first application start you will be shown the message to activate the Autostart or to turn it Off. You will be able to change this option also in the software settings afterwards.

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

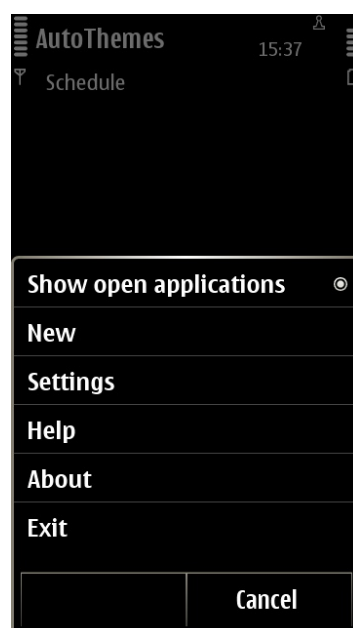

support@symbianguru.com

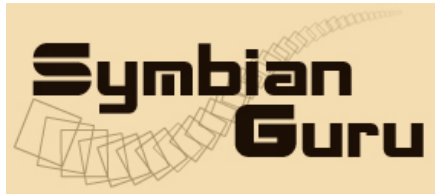

It is recommended that you turn the Autostart on, so AutoThemes will be booted together with your phone and you will not forget to turn it on.

Creating Rules

At first application start you will have no data on the main screen of the software. To start using AutoThemes you should press Options - > New

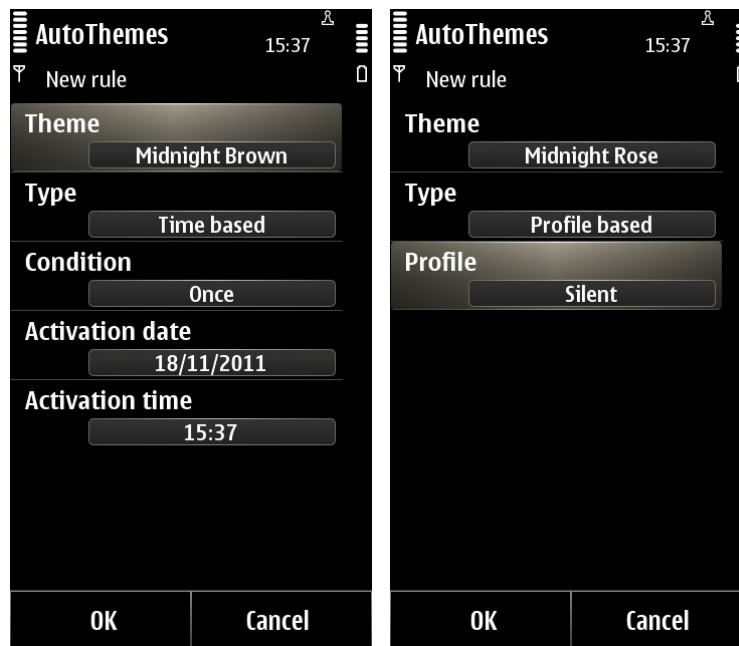

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

With pressing New button you choose to make a new rule, based on which your themes will be changed.

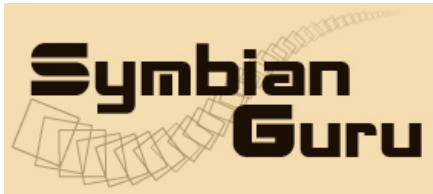

There are two types of rules, which you can select. There exist Time based rules (theme will be changed at a certain time) and Profile based rules (theme will be changed when a chosen profile is active).

Time Based Rules

In order to make a time based rule please go to Options – New and select the following fields:

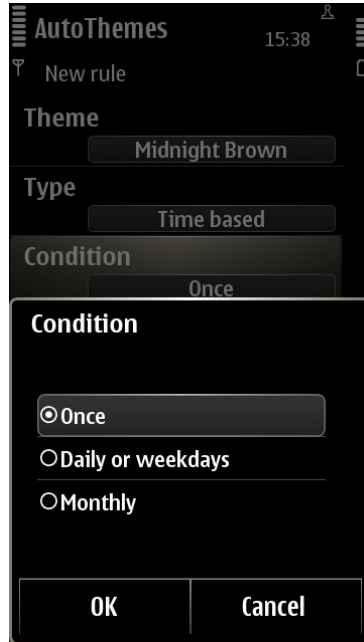

1. **Theme** - you should select the theme, which you want to be activated
2. **Type** - here you select the type of rule, Time based one
3. **Condition** - here you can select the frequency of theme changing (Once, Daily or weekdays, Monthly)

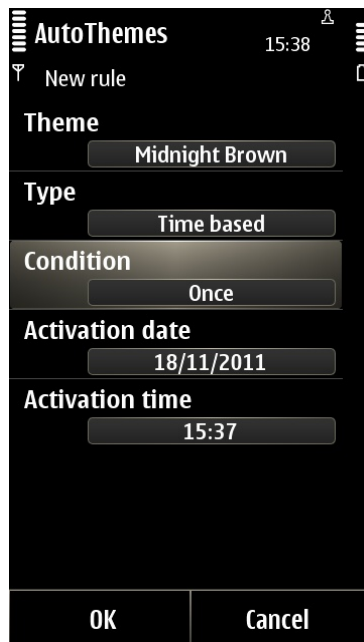

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

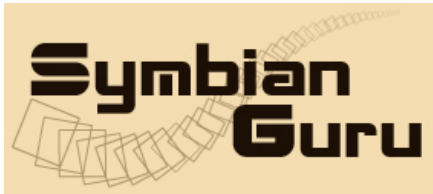

support@symbianguru.com

If you choose 'Once' condition, you should enter the activation date and activation time of the rule.

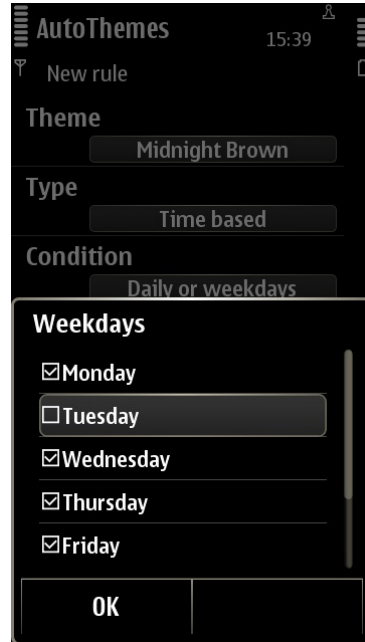

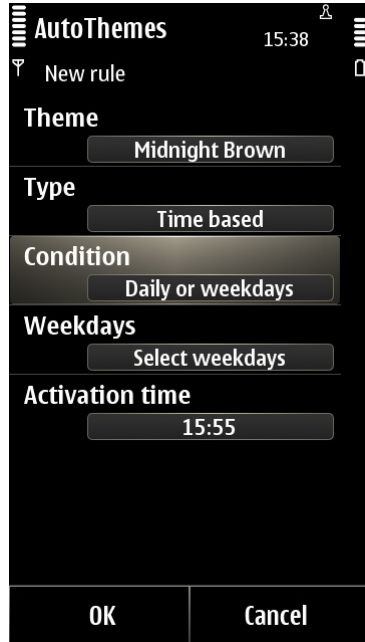

If you choose 'Daily or weekdays' condition you should also enter the Day of the week when your theme will be activated and to enter the activation time of the rule.

support@symbianguru.com

Profile based rules

In order to make a ***profile based rule*** please go to Options – New and select the following fields:

1. Theme: here you should select the theme, which you want to be activated. The list of themes may differ; it depends on themes, which are present on your phone.

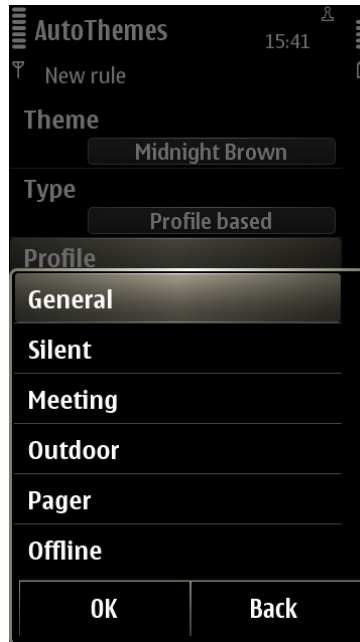

2. Type: here you select the type of rule, in this case it is Profile based
3. Profile: here you should select the profile of theme activation

SymbianGuru.com Your guru in mobile software.

support@symbianguru.com

List of rules

After creating at least one rule, the main screen of the software will change its view

Time based and profile based rules have different icons.

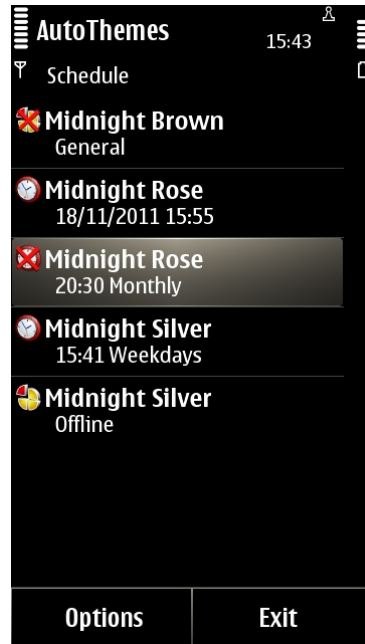

To quickly deactivate one of the rules in the list of all available, you should press the Fire key button. You can also do the same action pressing left soft key Options -> Disable

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

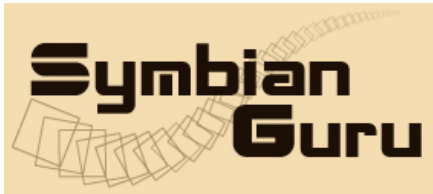

You can edit all rules choosing Options – Edit or delete the rule by choosing Options – Delete or Options – Delete all.

AutoThemes Options

When you press the left soft key Options you have the following possibilities:

- New – create the new rule
- Edit – edit the settings of the rule
- Disable/Enable – disable/enable the previously selected rule
- Delete – delete only one rule, which was previously selected
- Delete all – delete all rules in the list
- Settings – settings of the software, which you can change
- Help – short info for user to use the software
- About – short info about company and contacts
- Exit – exit the application

www.symbianguru.com

support@symbianguru.com

AutoThemes settings

In order to change AutoThemes settings, you should press the left soft key Options - Settings. You will be able to change the following settings:

- Active – here you can activate or deactivate the software
- Autostart – here you can turn autostart on or off.

How to uninstall AutoThemes

In order to uninstall AutoThemes, please go to the Menu → System → Applications Manager, choose the AutoThemes Application from the list and uninstall it in the usual way.

AutoThemes Support

If you have any questions or concerns regarding the program, please contact us at support@symbianguru.com. Our experienced support team is always ready to help you.
