How to register LoudSpeaker

The trial version of the software is limited for 10 days. The full version of the software is obtained by a license code provided upon purchase. The license code is based on the unique IMEI provided and the application can be used exclusively on the device it is licensed for. The license cannot be retrieved and applied to other devices.

You can also buy the software directly from your mobile phone using your credit card. To buy the software you should press Options – Buy and follow the instructions.

How to install LoudSpeaker

Please transfer the .SIS file to your mobile phone via Bluetooth, IRDA or Cable. After that, follow the installation instructions on the mobile screen. You can install LoudSpeaker either on your phone memory or on the memory card.

Note! It is required additional application VoipAudioServer v 2.0 for S60 5th edition phones for normal functionality of the LoudSpeaker application. VoipAudioServer v 2.0 application you are able to download from our site with the LoudSpeaker application.

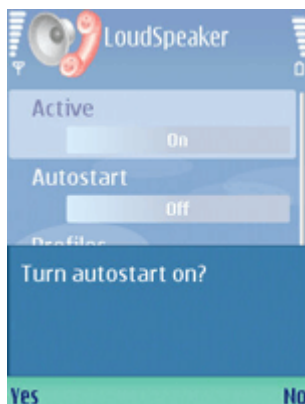

Working with LoudSpeaker

General information

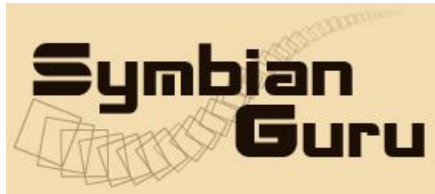

LoudSpeaker application is meant to turn on the Loudspeaker of your phone automatically according to the profile selected.

Note! LoudSpeaker application is inactive in case of phone lock.

Application start

At first application start you will be shown the message to activate the Autostart or to turn it Off. You will be able to change this option also in the software settings

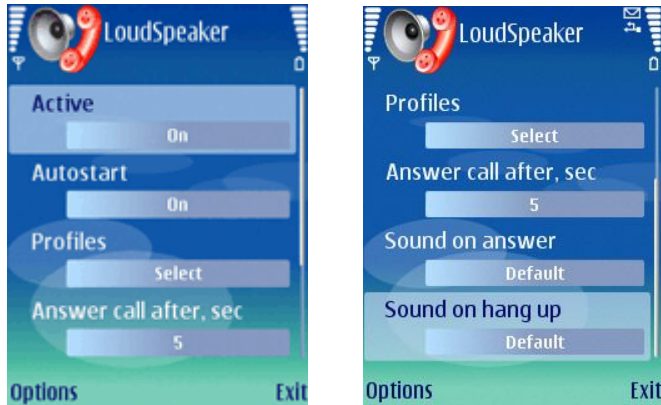

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

afterwards. After selecting the status of auto start feature, you will see the main screen of the application with the list of all possible settings, which you are able to change.

Note! To apply changed settings it is required to exit application's UI

LoudSpeaker Settings

LoudSpeaker Settings are placed in the main application screen. You can adjust following settings:

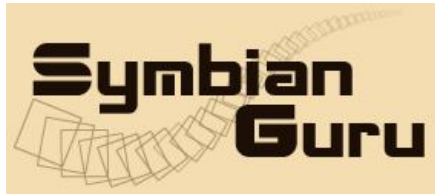

Active - On/Off

LoudSpeaker can be set to Active or Inactive. If you want to activate application and turn on your Loudspeaker automatically, you should press the Fire Button and the value in the field 'Active' should change to 'On', to deactivate it - press Fire Button once again and the Loudspeaker will be deactivated; the value will be changed to 'Off'.

Autostart

At the first application start you will be prompted to turn the Autostart option on. This means that application will be started every time the phone starts, so you will not have to start it manually each phone's start.

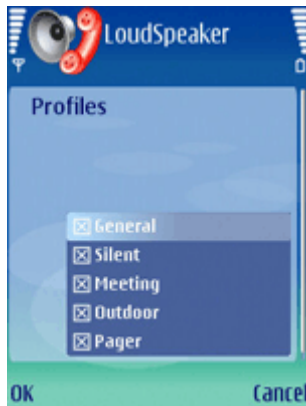

Profiles

SymbianGuru.com Your guru in mobile software.

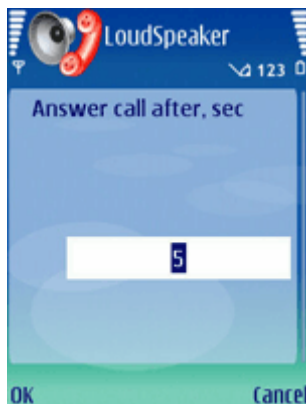

www.symbianguru.com

support@symbianguru.com

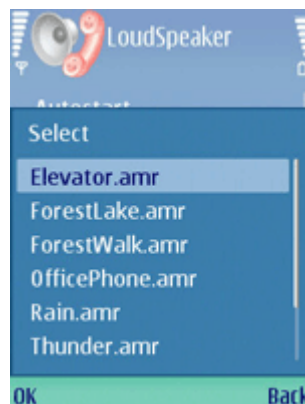

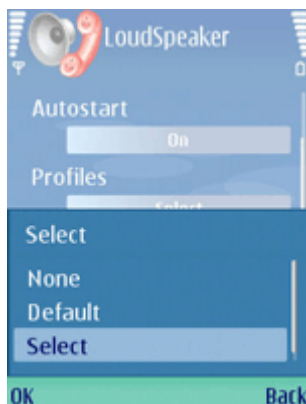

Here you can select profiles, on which the software will be activated. For example, you do not want to activate the LoudSpeaker on Meeting so you should deselect it – press Fire Button on the Meeting profile and Meeting profile will be deselected.

Answer call after, sec

Here you should define the amount of seconds, after expiration of which the software will automatically answer the call and loudspeaker will be activated, so you will be able to speak remotely.

Sound on answer / Sound on hang up

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

Here you can select the sound which will be active on Answer or on Hang up. Default sound on answer is short and the volume of one is set to low.

LoudSpeaker Options

User can access Options of LoudSpeaker with one click on the Options button:

Register – field for entering Registration Code

Buy –you can buy the software directly form the mobile phone

Help – contains all necessary information for navigation across the application

About – contains brief information about the developer

Exit – exits the application

How to uninstall LoudSpeaker

In order to uninstall LoudSpeaker, please go to the Menu → System → Applications Manager, choose the LoudSpeaker Application from the list and uninstall it in the usual way.
