How to register PhotoFun

The trial version of the software is limited to 3 days. During 3 days you can test the application with full features. After 3 days you will not be able to launch the application unless registered.

The full version of the software is obtained by a license code provided upon purchase. The license code is based on the unique IMEI provided and the application can be used exclusively on the device it is licensed for. The license cannot be retrieved and applied to other devices.

How to install PhotoFun

Please transfer the .SIS file to your mobile phone via Bluetooth, IRDA or Cable. After that follow the installation instructions on the mobile screen. You may install this software either on your phone memory or your MMC.

Working with PhotoFun

How to start

PhotoFun Application can be opened in following ways (depending on the phone):

- Clicking on the Menu button → PhotoFun
- Clicking on the Menu button → My Own/Applications → PhotoFun

General information

PhotoFun application gives you possibility to make photo with different funny templates, which you have previously selected. The software has some templates preinstalled, but you also can make your own templates or download more templates from SymbianGuru page www.symbianguru.com .

First application start

After launching the application you are able to make photos with the default template immediately by pressing Joystick OK key.

support@symbianguru.com

Change template

To change the current template you have to click left soft key Options → Change template. You will have to select one from the list of all possible templates by pressing Joystick OK key or pressing Select item from Options menu.

Also you are able to select such options from Options menu

- Select – select current template
- Preview – preview current template
- Delete – delete current template
- Delete all – delete all templates

Night mode /Flash mode

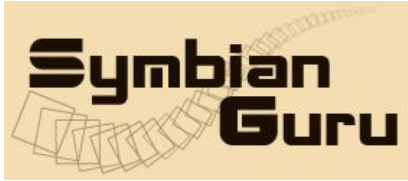

You can activate or deactivate the night mode by pressing Options →Night mode→ On/Off

To activate/deactivate the Flash mode or make this mode automatic you should press left soft key Options → Flash mode → On/Off/Automatic.

Note: some mobile phones have no flash, so this option will be unavailable.

Settings

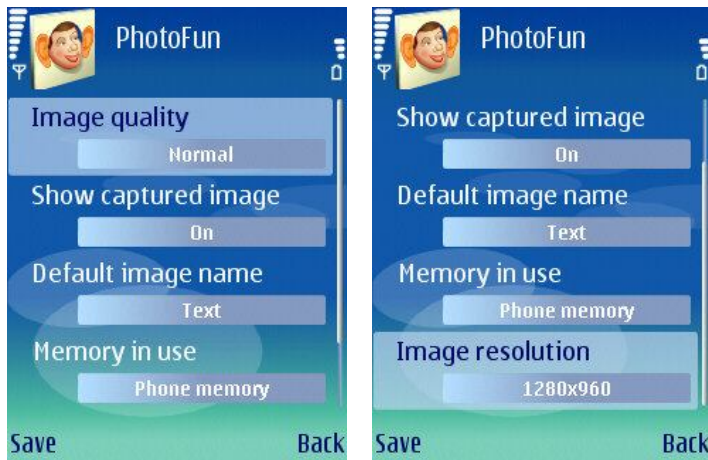

By pressing left soft key Options→ Settings you will be able to change the following:

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

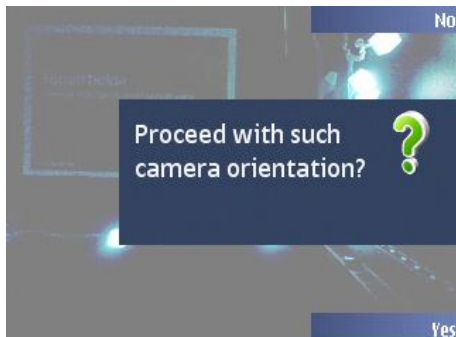

support@symbianguru.com

1. Image quality (High/Normal/Basic) – This depends on what photo you want to receive and where this photo will be using. If you want to receive a super photo image you should select the high quality option. If not you can select the normal or basic. The optimal option is Basic.
2. Show captured image (On/Off) – if you want to see the captured image, this option should be turned on
3. Default image name (Date/Text) – this option help you to define the name of the photo; it can be saved by date or by the default name, which can be edited (the default name is ‚FunnyImage‘).
4. Memory in use (Phone memory/Memory card) – you should select the memory, where your photos will be saved
5. Image resolution – here you can select the resolution of your photos. Higher resolution means more image detail.

Camera orientation troubleshooting

If you see query dialog "Proceed with such camera orientation?" on first application start and camera orientation is incorrect you can refuse it by pressing soft-key No. If such orientation is acceptable for you in this case you should press soft-key Yes.

support@symbianguru.com

If you choose wrong orientation by mistake you can change camera orientation by using Orientation option (Options → Settings → Orientation). This option allows you to select camera orientation from portrait and landscape modes.

How to uninstall PhotoFun v 1.1

In order to uninstall PhotoFun, please go to the Menu → System → Applications Manager, choose the PhotoFun Application from the list and uninstall it in the usual way.

PhotoFun Support

If you have any questions or concerns regarding the programm, please contact us at support@symbianguru.com. Our experienced support team is always ready to help you. We also encourage you to send us your ready templates if you want to share them, and we will publish them together with your name (if you wish) on our website.
