How to register AfterCall

The trial version of the software is limited for 10 days. The full version of the software is obtained by a license code provided upon purchase. The license code is based on the unique IMEI provided and the application can be used exclusively on the device it is licensed for. The license cannot be retrieved and applied to other devices.

How to install AfterCall

Please transfer the .SIS file to your mobile phone via Bluetooth, IRDA or Cable. After that follow the installation instructions on the mobile screen.

Working with AfterCall

How to start

AfterCall Application can be opened in following ways (depending on the phone):

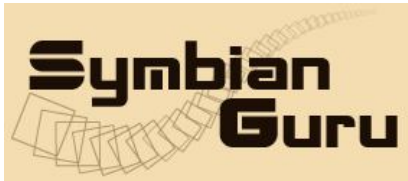

- Clicking on the Menu button → AfterCall
- Clicking on the Menu button → My Own/Programs → AfterCall

General information

AfterCall application is meant to save your time and ease your work with your incoming/outgoing/busy/rejected calls. You have a possibility to send SMS/MMS/E-Mail message, to add the number in the contact list or update the info of existing contact.

First Application Start

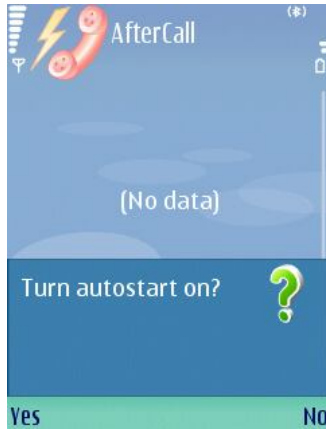

At first application start you will be shown the message to activate the Autostart or to turn it Off. You will be able to change this option also in the software settings afterwards.

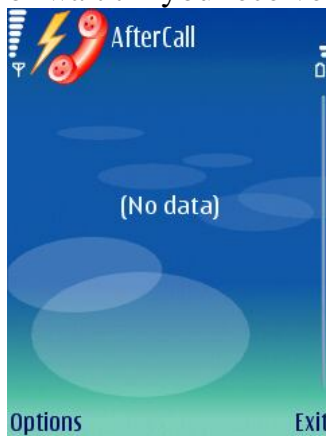

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

support@symbianguru.com

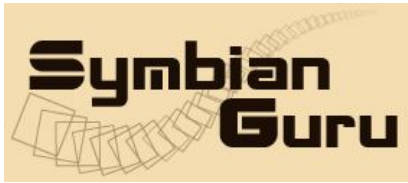

At first application start the software synchronizes data with call log data. If it is empty the 'No Data' message appears instead. If there is no data at all, you should make a call or wait till you receive some call from someone.

When you press AfterCall left soft key of this screen Options you will receive the following list of settings:

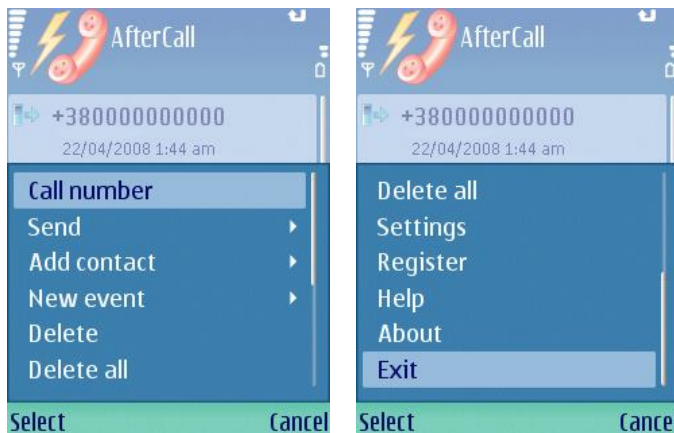

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

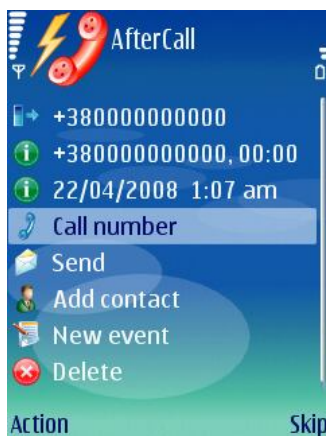

support@symbianguru.com

- Settings – option where you can modify Settings' fields
- Register – to enter registration code
- Help – contains all necessary information for navigation across the application
- About – contains brief information about the SymbianGuru
- Exit – exits the application

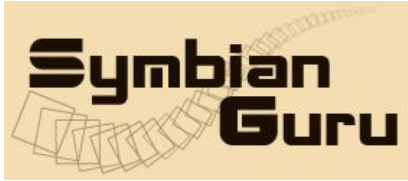

After you receive at least one call, menu Options will change its view and will be the following:

Also to see the window with all possible info and possible actions which can be performed to the number you can see after call ends:

Info, which is visible exactly after the call:

SymbianGuru.com Your guru in mobile software.

www.symbianguru.com

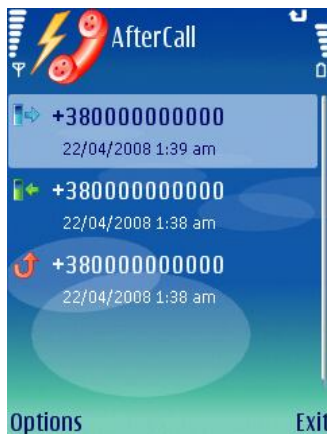

support@symbianguru.com

- Number of the phone and the type of the call (missed/outgoing/incoming/busy/rejected)
- Number of the phone and call duration
- Date and time of the call

Actions, which can be performed to the number:

- Call number
- Send SMS/MMS message
- Add contact (you can add the number to the list of contact or update info of existing one)
- New event (you can easily without unnecessary movement assign new meeting, create some note or add some task)
- Delete number (if you do not need the selected number any more you can easily delete it)

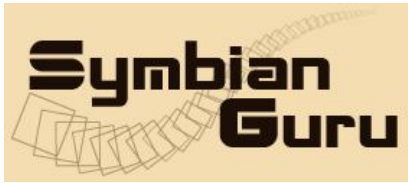

After you receive some calls or make them by yourself, your main screen of the program has been changed:

In the settings of the program you can select the number of the calls, which is visible on your main screen. To see the detailed call info you should press the Fire button.

AfterCall Settings

To access the AfterCall Settings you should press left soft key Options -> Settings
