How to install Currencies

Please transfer the .jar and .jad file to your mobile phone via Bluetooth, IRDA or Cable. You should execute the .jar file and the installation process begins. After that follow the installation instructions on the mobile screen.

Working with Currencies

How to start

Currencies Application can be opened in following ways (depending on the phone):

- Clicking on the Menu button → Currencies
- Clicking on the Menu button → My Own/Programms → Currencies

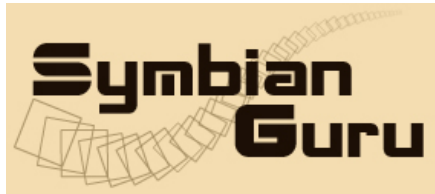

General information

Currencies application is meant to keep you up to date with exchange rates. There is unlimited amount of currencies that you may convert with currencies application.

At the first application start there is no data saved.

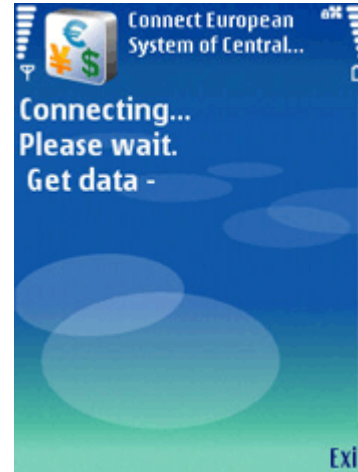

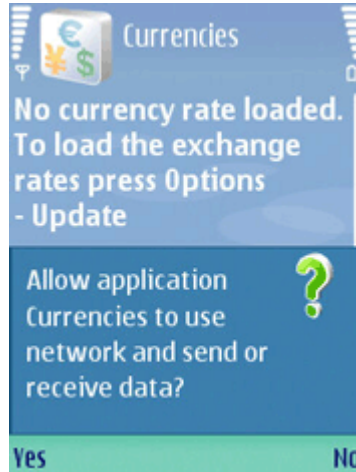

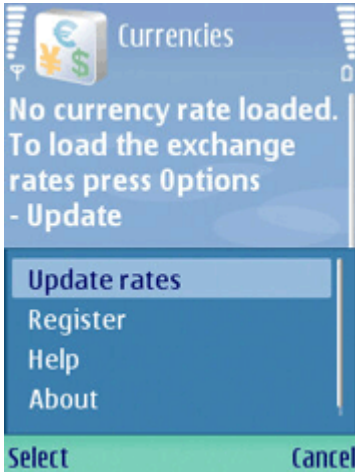

In order to start downloading all the data you need to press Options -> Update Rates:

www.symbianguru.com

support@symbianguru.com

After that you will access to all currencies exchange rates and be able to use the currency converter with saved currencies.

Application in action

Currencies

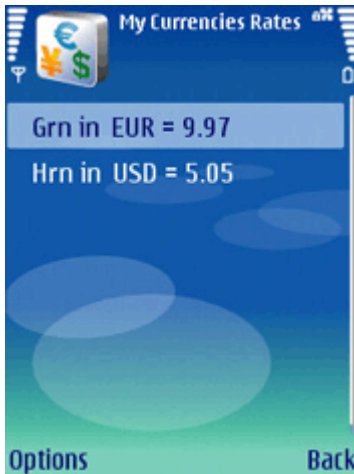

Application uses two types of currencies: the predefined ones and your own, which you can set in the My Currencies menu.

www.symbianguru.com

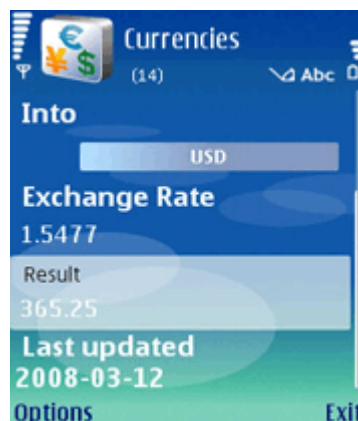

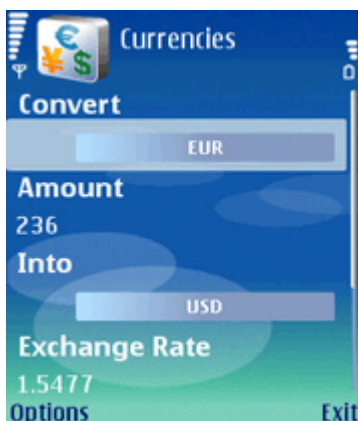

support@symbianguru.com

The predefined are downloaded from the European Central bank. You can easily define your own currencies in My Currencies option, set the exchange rates of your currency to one of the main currencies and to save it. As a rule your own currencies are listed at the end of the list.

After you download the exchange rates you can exchange currencies. You should enter the amount of currencies from which and to which you want to exchange. After that the software will automatically show you the result of this action. For example if you want to convert Euro into USD you will have the following field to fill:

1. The exchange currency which you want to convert
2. Amount of this currency
3. The exchange currency which you want to receive
4. The exchange rate according to which you currency will be converted
5. The result of conversion
